## PRECAUTIONS

1. FOR CONTINUED PROTECTION AGAINST FIRE HAZARD, REPLACE ONLY WITH SAME TYPE AND SAME RATING FUSE.

DESCRIPTION	PARTS NO.	SPECIFICATIONS
AC FUSE	252044	2A (ST-6) UL
SPEAKER PROTECTION FUSE	252025	2.5A-T

2. Always disconnect the chassis from power line cord when soldering.

Turning the power switch OFF is not enough.

Power line leakage passing through the heating element may destroy the transistors.

## SERVICE PROCEDURES

### 1. REMOVAL OF THE FRONT PANEL

- 1) Remove four screws holding the ampli. cover and side bracket.
- 2) Remove two screws holding the ampli. cover and back panel.
- 3) Pull out the control knobs.
- 4) Remove four screws holding the front panel and the front bracket.

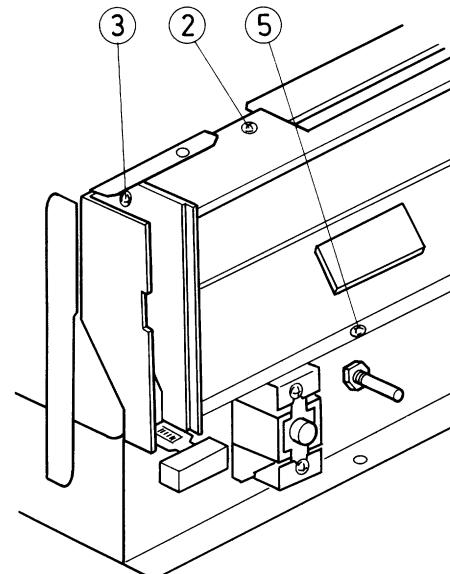

### 2. REMOVAL OF THE DIAL GLASS

Remove four screws holding the dial glass and the front panel.

NOTE: The dial glass has been mounted by applying an 800 gr torque to the screws. If the dial is removed during repairs, and a torque driver is available, apply 800 gr torque to the screws when replacing. If however, torque driver is not available, simply tighten the screws by hand. When replacing the dial glass, insert all relevant component parts in accordance with the cross sectional diagram.

### 3. REPLACING THE METER

- 1) Remove the top cover and front panel.
- 2) Remove the two screws secring the illumination bracket and front bracket.
- 3) Remove the two sets of screws secring the left and right dial plate frame and front bracket.
- 4) Remove the dial plate from the drive shaft.
- 5) Remove the three screws secring the front bracket and back plate.
- 6) The top and bottom side of the meter cover the fastened to the back plate by adhesive tape. Remove this tape, taking care not to jar knock the meters.

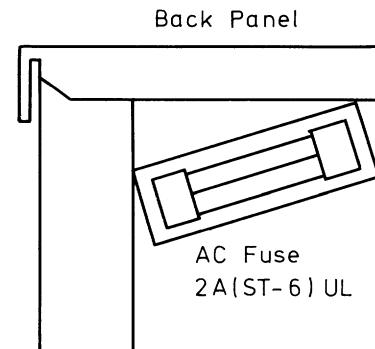

### 4. SENSOR SWITCH

For matching the automatic FM tuning servo locked system to the various operating conditions. Set to LOW initially and switch to HIGH if the TUNED lamp does not turn off as soon as the tuning knob is touched.

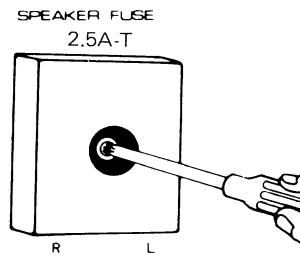

### 5. REPLACING THE AC FUSE

- 1) Remove the bottom board.
- 2) Replace the AC fuse with same type and same rating fuse.

### 6. REPLACING THE SPEAKER PROTECTION FUSE

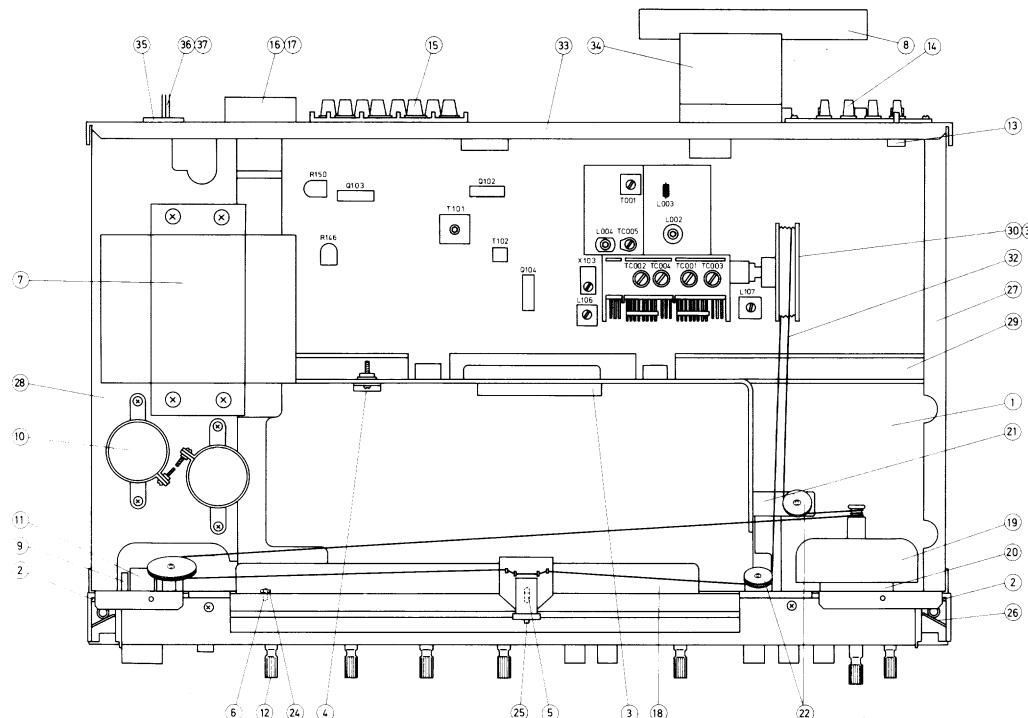

- 1) Remove a screw holding the cover and back panel and the cover.
- 2) Replace the fuse with same type and same rating fuse.

### 7. REPLACING THE INDICATOR LAMPS

All indicator lamps are linked to their respective lamp covers. So when replacing remove the defective lamp from the front bracket with its cover in place.
